

# R&D Center for innovative Drug Discovery

Since October 1st, 2019

100 years of vitality with new drugs and new technologies

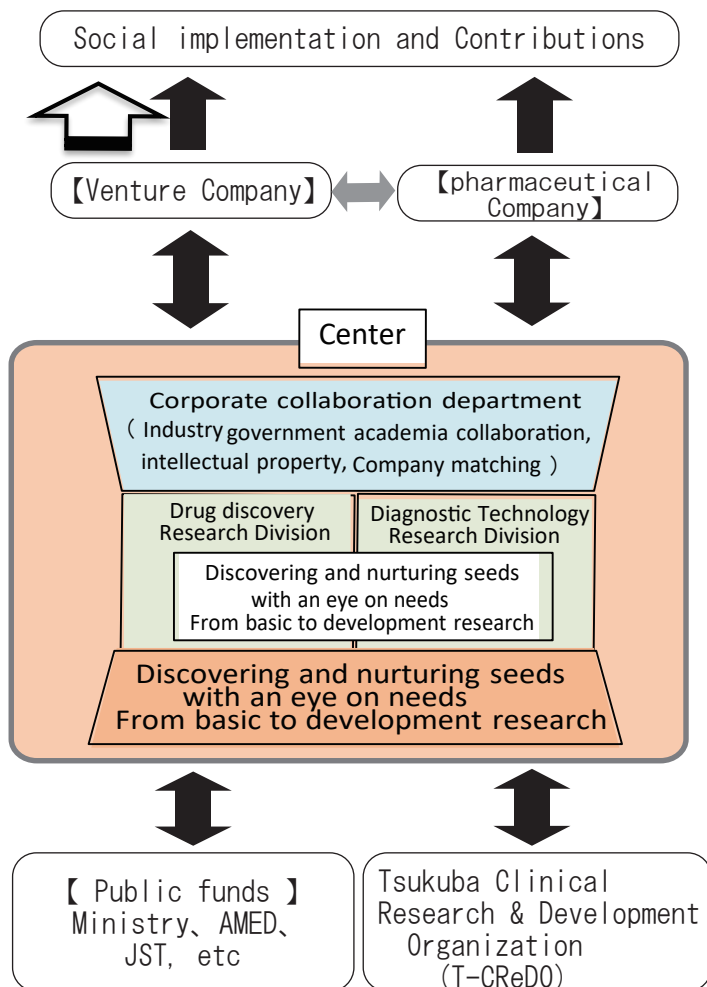

In Japan, a super-aging society with a declining birthrate is progressing and the disease structure is changing along with increasing lifestyle and aging-associated chronic intractable diseases such as cancer and circulatory, musculoskeletal, psychiatric and neurological, metabolic, and immune diseases. In such a situation, it is desired to create a society where all people can live alive with vitality, safety and peace mind at their respective life stages toward the era of 100 years of life. In recent years, there has been great interest and expectations for technological innovations that will support medicine, such as regenerative medicine, genomic medicine, artificial intelligence, and the use of big data. This center promotes basic and developmental researches for drug discovery / diagnostic technology to responds to medical needs in a society with a declining birthrate.

**Kazuko Shibuya, Ph.D.**  
Director, R&D Center  
for Innovative Drug Discovery

## Mission

### Overview the Center

### Expected results

- Creation of a lively and healthy society
- Revitalizing the medical industry
- Revitalizing young human resource development
- Promotion of industry-academia collaboration
